

THE HUSKY

THE MOST SURVIVABLE VEHICLE ON THE BATTLEFIELD.
THE LEADER OF THE ROUTE CLEARANCE PACKAGE.

REMOTE WEAPONS STATION (RWS)

Enables the Husky to defend itself as part of the overall security of the Route Clearance Package.

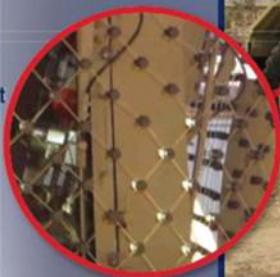

OWL 360 SA

Provides 360 degree situational awareness for operators. A PTZ camera provides up-close inspection capability while providing safe stand-off distance.

Q-NET

The lightest weight, safest and most effective RPG defeat system. 60% lighter than conventional systems.

PULSE INDUCTION (PI) METAL DETECTION

Magnetic Pulse Induction system with integrated diagnostics that automatically adjusts for height and stowage and a 5-color marking system.

SWATS III GUNSHOT DETECTION SYSTEM

The latest vehicle-mounted gunfire detection solution designed for use in both urban and rural environments where it can be challenging to locate the source of gunfire.

RC-PACK

An add-on capability for Husky and other platforms. This kit allows for autonomous, semi-autonomous, tele-operation and manned operations.

INTERROGATION ARM with THERMAL CAMERA

Increases survivability by allowing for operation and interrogation from inside the mine protected vehicle.

GROUND PENETRATING RADAR (GPR)

NIITEK's GPR provides unprecedented performance in the automatic detection, recognition and precision marking of buried explosive threats.
